MOWCS RELIEF RESPONSE TO THE KZN FLOODS DISASTER.

Meals On Wheels Community Services (MOWCS) South Africa CEO has announced that the non-profit organisation is ready to hit the ground running with relief to KwaZulu-Natal communities affected by heavy rains that resulted in destruction of infrastructure including homes.

“As a non-profit organisation that specialises (but not limited to), in providing meals to the destitute, we believe that hunger is the extreme materialisation of poverty and human deprivation, therefore mitigation of this, especially during this tragic disaster is vital. Food must be the least of things that the residents worry about especially at a time like this. We are committed as an organisation to provide a meal and any other form of support during this time to assist the residents that are affected by the KZN Floods,” said the CEO

MOWCS will be providing cooked meals to all the camps where the desponded residents are currently sheltered following devastating floods that wrecked havoc in different parts of KZN especially the coastal belt that includes eThekweni Municipality, Ilembe District, parts of uMgungundlovu and Ugu Districts

MOWCS will further assess the situation and the damages thereof to provide more assistance to the affected communities. The organisation is further inviting strategic partners and donors to join efforts in responding more effectively to this disaster as some areas are not accessible.
