GEOGRAPHY OF SOUTH AFRICA

Provincial, District Municipality and Local Municipality boundaries are based on the latest municipal boundary datasets published by the Municipal Demarcation Board in 2018. (<https://dataportal-mdb-sa.opendata.arcgis.com/search?tags=2018>)

The following changes between the 2011 and 2018 datasets have been detected.

1. Provincial boundary changes: 2011 to 2018

Provincial boundaries between 2011 and 2018 have remained stable with no changes in area or names.

3. Local municipal boundary changes (2011–2018)

In 2011, there were 234 local municipalities. In 2018, the number of local municipalities reduced to 213. The 2018 re-determination of boundaries resulted in three types of boundary changes, which can be categorised as follows:

- **Class 1 – Technical and minor boundary re-determinations**

This re-determination entailed a small-scale boundary adjustment and alignment with a minor impact on the geographic area with no impact on the capacity of the affected municipalities.

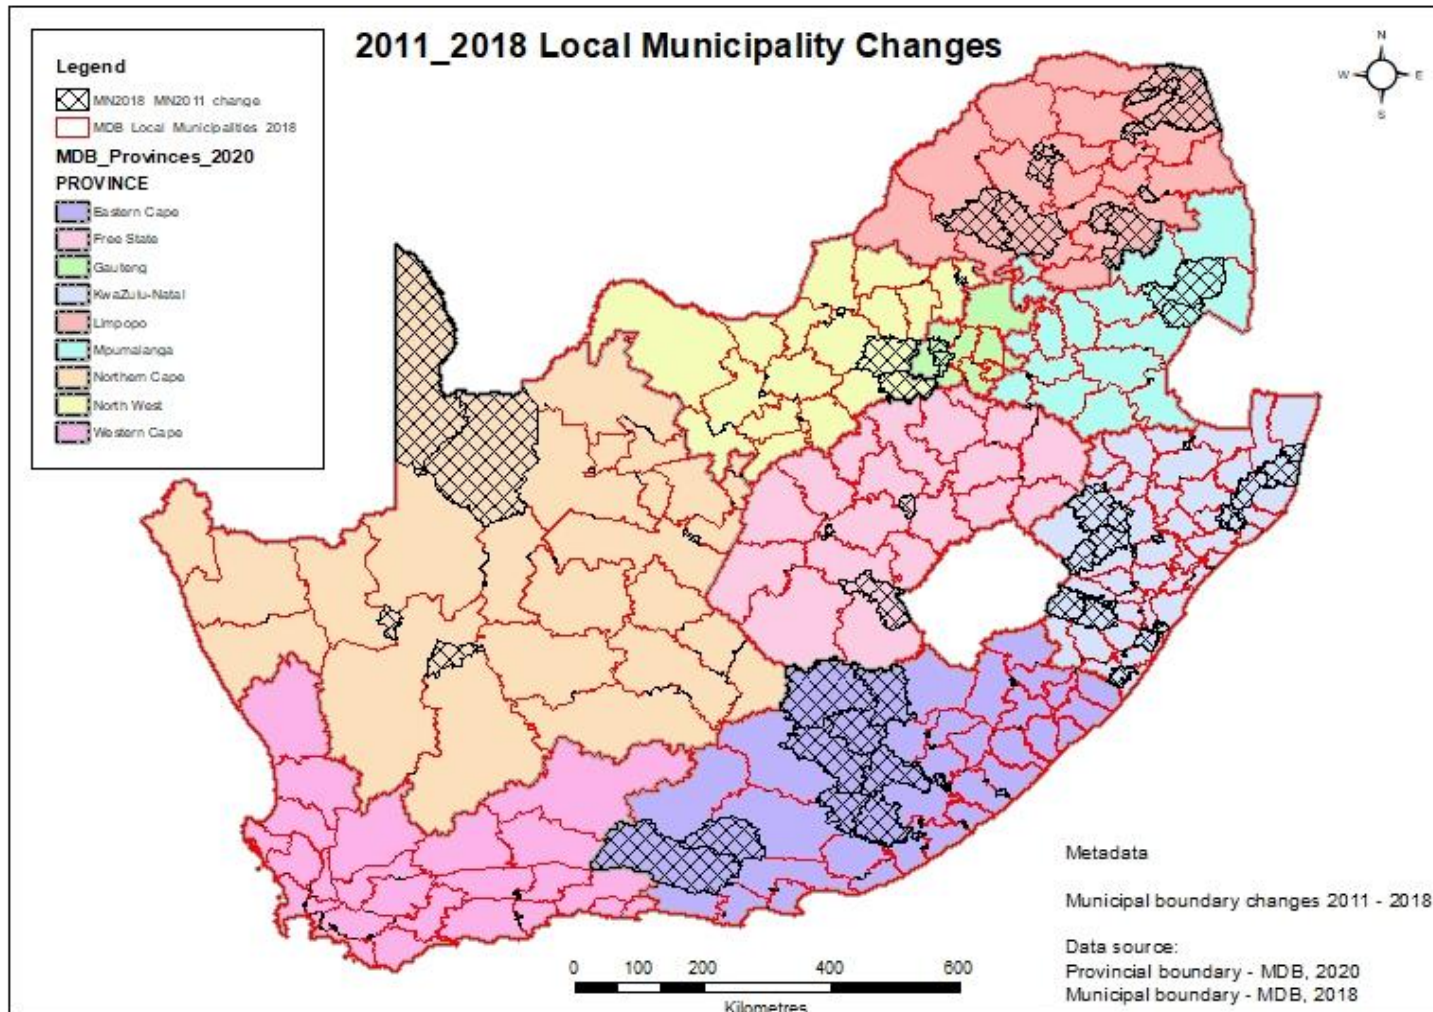

- **Class 2 – Consolidation and annexations**

This was a medium-scale boundary re-determination that may have an impact on a sizable geographic area. This type of determination may impact on ward arrangements but will not materially impact on the capacities of the affected municipalities to deliver services.

- **Class 3 – Amalgamations**

This type of re-determination entailed a major and large-scale municipal boundary re-determination, which will have a significant impact on the geographic areas and the capacities of the affected municipalities. The re-determination includes the merging of adjacent municipalities or the splitting of municipal areas to create other municipal areas.
